

Thank you for choosing Gateway Rasmussen!

Congratulations! You have created your Username and Password and you are ready to start your cookbook project!

Before you begin, please read the following for advice and tips on how to get the most from your online cookbook publishing experience.

DO choose your category headings carefully. If you have chosen one of our Stock Cover/Divider sets, remember that the category headings that are pre-printed on the dividers CANNOT be changed. You can add category headings of your own choosing but they will be considered as custom dividers. This means that either you will supply the images to be used for the new divider or you can choose one of our customizable Alternate dividers. These can be printed on colored paper of your choice.

DO proofread your recipes carefully, checking the accuracy of the title, contributor's name, ingredients and method. Major changes after you have received your proof may delay the printing of your cookbook and may result in additional costs.

DON'T email photos, ads, fillers, etc. to us until you have submitted your order form. Until we receive that we have no project number in which to place your electronic files.

DON'T email multiple files. Always call us first to ascertain the best method of transferring these files to us (Toll Free 1-800-665-4878).

DO feel free to call us at any time. We are always available to answer your questions. Remember, we have almost 50 years of experience in the cookbook publishing industry; take advantage of our expertise to assist you in any aspect of your cookbook project!
